KIRAN GOWDA D

COMPUTER ENGINEERING STUDENT • CYBERSECURITY • FULL-STACK DEVELOPMENT

Bengaluru, Karnataka | +91-8217045656 | kirangowda0226@gmail.com | linkedin.com/in/kiran-gowda-d-57114b329

CAREER PROFILE

Computer Engineering student pursuing B.E. in CSE with specialization in IoT and Cybersecurity including Blockchain. Interested in ethical hacking, web application security, networking, Linux and secure software development, while building practical full-stack applications with modern JavaScript technologies. Seeking internship opportunities to contribute to real-world engineering and cybersecurity projects.

EDUCATION

Sri Sairam College of Engineering	B.E. CSE (IoT, Cybersecurity including Blockchain)	2024–2028

EXPERIENCE

ServiceNow Virtual Internship Program | SmartBridge / ServiceNow University | **Apr 2026**

- Completed a one-month virtual internship program focused on ServiceNow platform fundamentals and workflows.
- Covered Welcome to ServiceNow, ServiceNow Micro Certification and ServiceNow Administration Fundamentals.
- Worked through Introduction to Agentic AI, Introduction to Flows, Automated Test Framework (ATF) Essentials and reporting.
- Completed learning modules supporting Certified System Administrator (CSA) exam preparation.

PROJECTS

KRISHIBANDHU • FULL-STACK APPLICATION

- Developed a full-stack agriculture platform focused on crop management and agricultural market information.
- Built the frontend with React and the backend using Node.js, Express.js and REST APIs.
- Used MongoDB for application data and integrated Maharashtra agricultural market information and price records.

DEXTRA · AI ASSISTANT · LIVE

· Built an AI-powered assistant web application featuring conversational AI and AI image generation.
· Developed a React frontend with Node.js and Express.js backend, integrating Google's Gemini API.

TECHNICAL SKILLS

Programming	C++, Python, C, Java, JavaScript
Frontend	HTML, CSS, JavaScript, React
Backend / Database	Node.js, Express.js, MongoDB, Firebase, REST APIs
Cybersecurity	Ethical Hacking, Web Security, Linux, Kali Linux, Networking
Tools	Git, GitHub, VS Code, MongoDB Atlas, Postman, Render

RELEVANT ACADEMIC AREAS & INTERESTS

- Data Structures & Algorithms, Database Management Systems, Operating Systems and Computer Networks.
- IoT technologies, cybersecurity fundamentals, web application security and offensive-security learning.
- Current learning focus: ethical hacking, web security, Linux, networking and secure full-stack development.

CERTIFICATIONS

- Ethical Hacking Foundations and HTML Injection — Packt / Coursera
- Computer Networks: Implementation & Security — EDUCBA / Coursera
- Introduction to Artificial Intelligence — IBM / Coursera
- Algorithms and Complexity — University of London / Coursera
- Agile with Atlassian Jira — Atlassian / Coursera
- Introduction to Software Engineering — IBM / Coursera
- Foundations of Cybersecurity — Google / Coursera

PUBLICATION

Published Chapter: “Graph Theory: Analysing Criminal Networks and Crime Pattern Detection” in the edited book “The Unified Vision: The Synergy of Engineering, Science, Humanities for Tomorrow” (2025).
